EXPERIENCE AND PROJECTS

SENIOR CAPSTONE PROJECT

Synergy Technologies Internship | 2021

- Responsible for providing and implementing IT solutions including but not limited to server deployment, networking, web development, and design.
- Liaised with internal and external stakeholders to ensure that the project vision was realised.
- Ultimately created a website that will be rolled out in Q1 2022.

OTHER PROJECTS

Online Credit Transfer System | 2021

- Coordinated creating and designing a web app with individual user authentication and user account records stored within a database.
- The front-end technologies I used were React js, Tailwind CSS.
- The back-end technologies I used were Firebase Authentication, Firebase FireStore.

Peer-to-Peer Minigame Application | 2021

- Designed and produced a UWP desktop application for peer-to-peer gaming.
- The front-end technologies I used were XAML and C#.
- The back-end technologies I used were Azure SQL Database, C#.
